Worlds in collision

Well, the fact that this book of pseudo-science has respectable ratings and fairly positive reviews here, it appalls me. It makes the the ignorance and mysticism in general populace very evident that they, after failing to understand Science and scientific methods, have embraced the fantasy of pseudo-science which gives them the grandeur and connection with the cosmos which every human seeks.In this book, author claims an explanation of the biblical events of Exodus; which include the Earth stan Well, the fact that this book of pseudo-science has respectable ratings and fairly positive reviews here, it appalls me. It makes the the ignorance and mysticism in general populace very evident that they, after failing to understand Science and scientific methods, have embraced the fantasy of pseudo-science which gives them the grandeur and connection with the cosmos which every human seeks.In this book, author claims an explanation of the biblical events of Exodus; which include the Earth standing still, parting of the Red sea, high tides, earthquakes, famine, swarm of vermins and elimination of Egyptian pharaohs; by a divine providence which had caused the ejection of Venus from Jupiter as a comet-like body and making a near-collision with Earth when Mars also happened to be around. He attributes all the catastrophies described in the ancient texts to this near-collision event of the three planets. He makes use of supposed concordance between myths of different cultures, taken from different timelines and blatantly ignores the prospect of diffusionist tendency of the myths to attribute for the similarity observed among stories of different cultures.He, then ventures further to embark upon some more fantastic theses, such as manna(sugar) falling from a tail of Comet to provide the sustenance of 40 years for a hundred thousand Jews. An entirely unfeasible prospect, if we consider the desired mass of sugar for such a purpose and the percentage of carbohydrates observed in Comets, such a comet would have to be more massive than the Sun. He imagines electric and magnetic forces operating on cosmic scales, without considering the magnitude of the forces required would have obliterated any life on Earth. He also draws an analogy between the Solar system and an atom, talking of planets as electrons and their supposed collisions as change in their quantum state by absorpton of a photon. He doesn't only ignore the difference between electric and gravitational forces, he also seems to be plainly ignorant of basic atomic structure, where diffused electron clouds are found instead of imagined discrete electrons.He doesn't only take all the myths to be literally true at their face value, but also ignores the most sound scientific principles such as Newtonian mechanics. Many of the concordances among the various myths are included and considered by him, but I didn't see any mention of the discordances that might exist.Ejection of Venus from Jupiter is taken from the Greek myth that goddess Athena was born from the head of Zeus, which he translates word to word in cosmological language. Escape velocity of Jupiter is much greater than the speed required for an object to escape the gravity of Sun at the orbital position of Jupiter. If a body is ejected from Jupiter, it would possess the velocity to flung itself into interstellar space, it can't come near Earth and make itself a planet like Venus. There are hundreds of inconsistencies in this book, it would take another book to describe and falsify them.At best, it is a lame attempt to validate the ancient myths and fictions and establish them as true by making a supposedly scientific explanations for them. Despite the efforts of many scientists including Carl Sagan to describe this book as a whole lot of baloney and fantastical literature, it seems to be appreciated and embraced by those who have found their religious and mystical beliefs to be rendered false by application of Science. In an age where people seem to be retreating back to the dark ages because of uncertainties and turbulence brought forth by incompetent and malicious exploitation of technology, this book serves as a tool on which they could rely upon and ridicule the Science which they think to be the cause of their problems. However, this books claims to be Scientific in nature despite its blatant ignorance of Science and scientific methods, supporters of this book read it to validate and seek their mystical fantasies which Science so mercilessly falsifies. All the supporters of this book seem to confuse the term research with cherry-picking, when the theories which validate the ideas presented in the book are embraced and those are ignored or rejected which prove as counter-evidence of Velikovsky's hypotheses. This sort of double-standard is completely atypical of research culture and no effort should be spared to denounce such a propagation of ignorant pseudo-science with its false ideas.If the topics described in the book raise your curiosity, I will suggest to read the exquisite description and critical analysis of this book by Carl Sagan in his book Broca's Brain: On Romance of Science. Do not read this book unless you have excessive free time and capability to spend no more than three hours for this book of 350+ pages. ...more Never at Rest and The Newtonian Revolution Preview Preview On Jun 24, 2019, Anonymous said: My 10th grade teacher should have had me reading this instead of esoteric Shakespeare. Velikovsky's research is extensive and unrefutable. IMHO: A must read for anyone searching for the true history of this God forsaken planet. Question Everything. CC0/Maklay62/Pixabay The 10 wealthiest people in the world are businessmen and entrepreneurs who work in a variety of industries, but they all have one thing in common. As of January 2019, the 10 richest people in the world are all self-made billionaires who worked hard to achieve their goals. They are:Jeff BezosACCORDing to CBS, Amazon founder Jeff Bezos is currently the wealthiest man in the world with a net worth of around \$137.2 billion as of January 2019. He started the business from scratch in his garage in 1994, and today, it's the world's leading online marketplace. However, the entrepreneur's position as the wealthiest person in the world is also at risk as of 2019. He and his wife, MacKenzie S. Bezos, filed for divorce, and if she receives half of his money, she could become the wealthiest woman in the world.CC BY 2.0/US Secretary of Defense/Flickr Bill GatesComing in at number two is another familiar face: Microsoft co-founder Bill Gates. Gates is worth an estimated \$89.5 billion, aCCORDing to Business Insider, and currently serves on Microsoft's board. He was CEO of the company until 2000.CC BY 2.0/Sebastian Vital/Flickr Warren BuffettFamed businessman Warren Buffett takes the third spot on the list with an estimated net worth of \$78.7 billion, aCCORDing to Business Insider. He earned his money by purchasing the holding company Berkshire Hathaway and turning it into a major multinational conglomerate.CC0/freeimage4life/Flickr Bernard ArnaultFrench Businessman Bernard Arnault is the fourth-wealthiest person in the world and the first non-American to make the list. While he did inherit some money from his father, he earned most of his net worth of \$66.1 billion by turning LVMH into the largest seller of luxury goods in the world, aCCORDing to Business Insider.Amancio OrtegaSpanish billionaire and businessman Amancio Ortega takes the fifth spot with an estimated net worth of \$57.7 billion, aCCORDing to Business Insider. He's the founder of the fashion group Inditex which owns world-famous brands, like Zara.CC BY 2.0/Jeepers Media/Flickr Carlos SlimThe sixth-wealthiest person in the world hails from Mexico, and aCCORDing to Business Insider, he has a net worth of around \$56 billion. Carlos Slim founded and currently owns a conglomerate called Grupo Carso.CC BY 2.0/ITU Pictures/Flickr Mark ZuckerbergNot only is Mark Zuckerberg the seventh-richest person in the world, but he's also the youngest on the top 10 list of the world's wealthiest people. The Facebook founder is worth an estimated \$52.3 billion, aCCORDing to Business Insider.CC BY 2.0/The Brian Solis/Flickr Larry PageGoogle co-founder Larry Page is worth \$50.5 billion, Business Insider reports. He launched the company in 1998, along with Sergey Brin who is currently the ninth-wealthiest person the world. Today, Page serves as the CEO for the multinational conglomerate Alphabet, Inc.CC BY 2.0/BloomEnergy/Flickr Sergey BrinSergey Brin, the other half of the Google co-founding team, is worth a little less than his partner at \$49.1 billion, aCCORDing to Business Insider. Brin currently serves as the president of the multinational conglomerate Alphabet, Inc.CC BY 2.0/jdlasica/Flickr Larry EllisonLast but not least is Larry Ellison who rounds out the top 10 list with what Business Insider reports as a net worth of approximately \$48.9 billion. Ellison got his start when co-founded a programming firm that eventually went on to work for the CIA. That company is known today as Oracle.CC BY 2.0/Oracle_Photos_Screenshots/Flickr MORE FROM QUESTIONSANSWERED.NET
